## **DETAILED ACTION**

### ***Election/Restrictions***

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

**Group I**, claim(s) 1-13, are drawn to an antireflection film (generically) comprising a transparent support ( $A_{Br}$ ) and a low-refractive index layer ( $B_{Br}$ ).

**Group II**, claim(s) 14-18, are drawn to method of manufacturing an antireflection film (generically) comprising a transparent support ( $A_{Br}$ ) and a low-refractive index layer ( $B_{Sp}$ ).

**Group III**, claim(s) 19-28, are drawn to an antireflection film comprising a support ( $A_{Sp}$ ) and a low-refractive index layer ( $B_{SpI}$ ).

**Group IV**, claim(s) 29, is drawn to a method of manufacturing an antireflection film (generically) comprising a transparent support ( $A_{Br}$ ) and a low-refractive index layer ( $B_{SpII}$ ).

**Group V**, claim(s) 30-39, are drawn to polarizing plate (generically) comprising a polarizing

Art Unit: 1794

sheet (C<sub>Br</sub>), a transparent protective film (D<sub>Br</sub>), and an optical compensation film (E<sub>Sp</sub>).

**Group VI**, claim(s) 40-42, are drawn to a method of producing a polarizing plate.

**Group VII**, claim(s) 43-45, and 59 are drawn to an image display device (generically).

**Group VIII**, claim(s) 46-58, are drawn to a liquid crystal display element (generically)

comprising an upper polarizing plate (F<sub>Br</sub>), lower polarizing plate (G<sub>Br</sub>), and two cell substrates (H<sub>Br</sub>).

2. The inventions listed as Groups I-VIII do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The claimed antireflection film is the technical feature common to groups I-VIII; however, Suzuki (US 7,770,306 B1) teaches the claimed antireflection film (Title: "Antireflection Film," and Abstract, lines 1-2, "An antireflection film, containing ultrafine particles, formed of a resin composition having excellent dispersibility of ultrafine particles in a binder resin and capable of preventing whitening ...."). Hence, there is no single general inventive concept because Suzuki teaches the claimed antireflection film.

3. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not

Art Unit: 1794

distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

5. The examiner has required restriction between product and process claims. Where applicant elects claims directed to the product, and the product claims are subsequently found allowable, withdrawn process claims that depend from or otherwise require all the limitations of the allowable product claim will be considered for rejoinder. All claims directed to a nonelected process invention must require all the limitations of an allowable product claim for that process invention to be rejoined.

In the event of rejoinder, the requirement for restriction between the product claims and the rejoined process claims will be withdrawn, and the rejoined process claims will be fully examined for patentability in accordance with 37 CFR 1.104. Thus, to be allowable, the rejoined claims must meet all criteria for patentability including the requirements of 35 U.S.C. 101, 102, 103 and 112. Until all claims to the elected product are found allowable, an otherwise proper restriction requirement between product claims and process claims may be maintained.

Withdrawn process claims that are not commensurate in scope with an allowable product claim will not be rejoined. See MPEP § 821.04(b). Additionally, in order to retain the right to rejoinder in accordance with the above policy, applicant is advised that the process claims should be

Art Unit: 1794

amended during prosecution to require the limitations of the product claims. **Failure to do so may result in a loss of the right to rejoinder.** Further, note that the prohibition against double patenting rejections of 35 U.S.C. 121 does not apply where the restriction requirement is withdrawn by the examiner before the patent issues. See MPEP § 804.01.
